BENEFITS

- **Performance.**- The system is powered by complex algorithms that deliver the highest security standards and performance.
- **Capacity.**- It operates efficiently with thousands of load centers and processes millions of readings.
- **Configurability.**- The platform is customized to include the special commercial agreements of the Producer.
- **Compliance.**- Trefoil Energy[®] includes over 4,000 business rules that comply with Mexican regulations. It produces and sends an electronic invoice with the digital stamp authorized by the SAT (Tax administration).
- **Executive.**- It offers versatile reports of high value and critical information for business decision-making, e.g. Historical Savings, Contribution Margin, Expense Recovery, Renewable Energy Certificates, etc.
- **Insightful.**- For renewable energies, it provides tools to manage the Virtual Energy Bank that will help increasing revenue and profits.
- **Interoperability.**- The platform supports loading information from different type of files such as XLS, XML, DBF, CSV, PRI, TXT, etc.

In summary, Trefoil Energy Suite is a huge aid to energy managers; it performs the workload with efficiency and predictability, freeing administrators' time for analysis and decision-making to improve the effectiveness and profitability of your business.

Delaware Software accounts 20 years of experience developing high-quality software with the last 12 years immersed in the Mexican Electrical Industry.

Since 2008 Delaware Software is Partner of the Software Engineering Institute SEI and Carnegie Mellon University, certified as one of the best companies in software quality of the world, "*Excellent in schedule, cost, quality performance, and scope*", (SEI-Carnegie Mellon, 2012).
